

Job Title: Plant Manager
Location: Camden, Camden, AR
Department: Technical
Reports to: General Manager

SUMMARY

This position reports to the General Manager and must be knowledgeable in the operations and maintenance of a hybrid-fiber-coaxial cable television system. Duties will include coordinating, supervising and training technical department employees, and record keeping. The individual must be detail oriented and knowledgeable in cable television construction techniques, cable TV technology, and headend equipment and must be able to demonstrate knowledge in the areas of installer-technician and maintenance-technician fiber optics and broadband services.

The position requires the ability to lead and manage according to the general manager's mission, goals, and objectives with the technical policies/procedures, technical personnel (Lead Technicians, Technicians, Service Technicians, Installers and Inventory controllers) and customer service functions in the field of work.

Salary to be determined based on applicant's qualifications and experience.

ESSENTIAL DUTIES AND RESPONSIBILITIES include the following (other duties may be assigned):

1. Provide the leadership and example in the areas of customer service, customer satisfaction, integrity, work ethic and fieldwork.
2. Provide customer friendly management, administration, and supervision of all aspects of field operations work force, including applicant interviews, hiring decisions, performance reviews, praise and reprimands, and terminations when necessary according to Company policies.
3. Perform various exception duties outlined and specified by the General Manager.
4. Maintain and practice all engineering policies and practices of WEHCO Video.
5. Establish and manage quality control measures and oversee successful plant maintenance.
6. Interview all technical personnel and, if desired, a final interview of installers after the installation supervisor interviews.
7. Recommend job performance by technical personnel.
8. If necessary, fill in any position (Lead Tech, Tech, Maintenance Tech, Installer, Service Tech and Inventory controller) during the absence of an employee in order to maintain the integrity of customer service.
9. Prepare a technical training agenda for new and existing personnel.
10. Assist General Manager in establishing procedure in order to achieve optimal customer service, functionality and efficiency within the field of work.
11. Subject to approval of General Manager, establish policy in order to achieve excellent customer service, technical function and personnel morale.
12. Maintain proper CLI program and file.
13. Maintain proper vehicle inspection program.
14. Assist general manager in preparing annual capital and operating budget requests for submission to the corporate office and help general manager monitor department budget and cost controls.

15. Maintain and balance all purchase orders to inventory received.
16. Liaison between all utilities and municipal or county street departments.
17. Establish work productivity goals and appropriate control procedures.
18. Assure forward and reverse plant maintenance is performed on a routine basis.
19. Evaluate and assure work quality and productivity of field employees is monitored.
20. Maintain adequate staffing levels and ensure technical department employees are adequately trained to perform duties safely, effectively, and efficiently.
21. Assure technical department operations comply with all local, state, and federal workplace rules.
22. Administration of CLI program and preparation, review, or submission of all departmental reports.
23. Ensure system equipment, from headend to subscriber meets or exceeds industry, FCC, and cable franchise technical standards.
24. Assistance as necessary to Maintenance Technician.
25. Coordination with the Install/Technician Supervisor to establish production priorities for department in keeping with effective operations and cost factors.
26. Reviews and analyzes production, quality control, maintenance, and operational reports to determine causes of nonconformity with industry or company guidelines, and operating or production problems.
27. Develop and implement operating methods and procedures designed to eliminate operating problems and improve operational efficiency.
